

DATEX II as a source for displaying travel times on VMS

Kjersti Leiren Boag

Norwegian Public Roads Administration

5th Datex II User Forum, Utrecht

NPRA's Traffic Management Centres

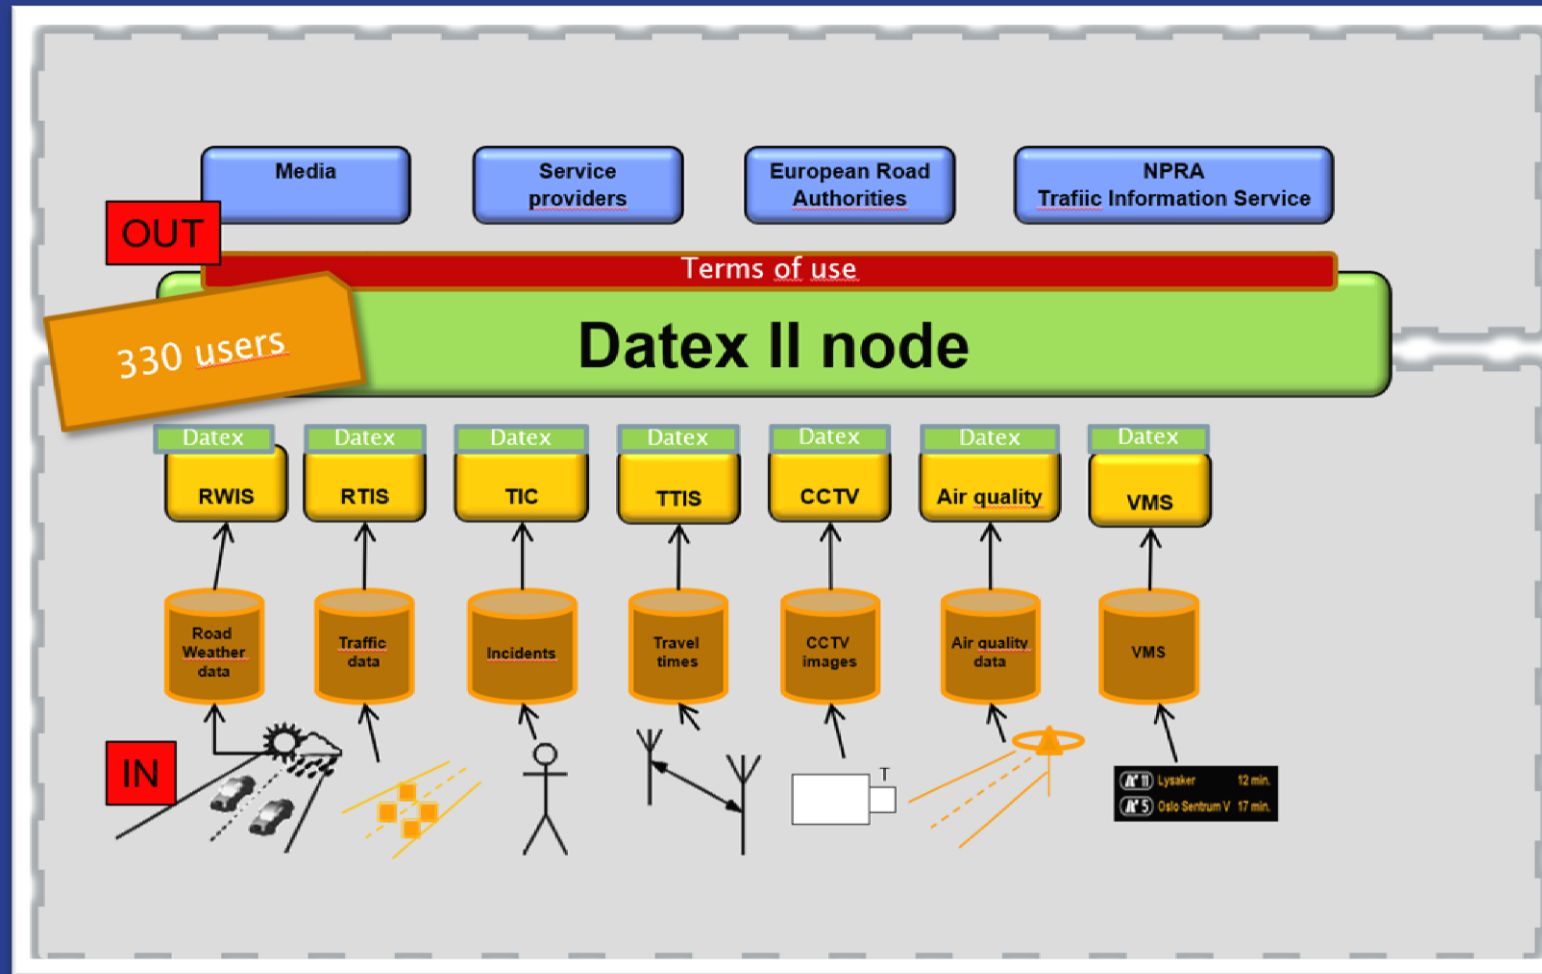

Key responsibilities:

- traffic surveillance
- traffic incident management
- traffic control
- traffic information

DATEX II

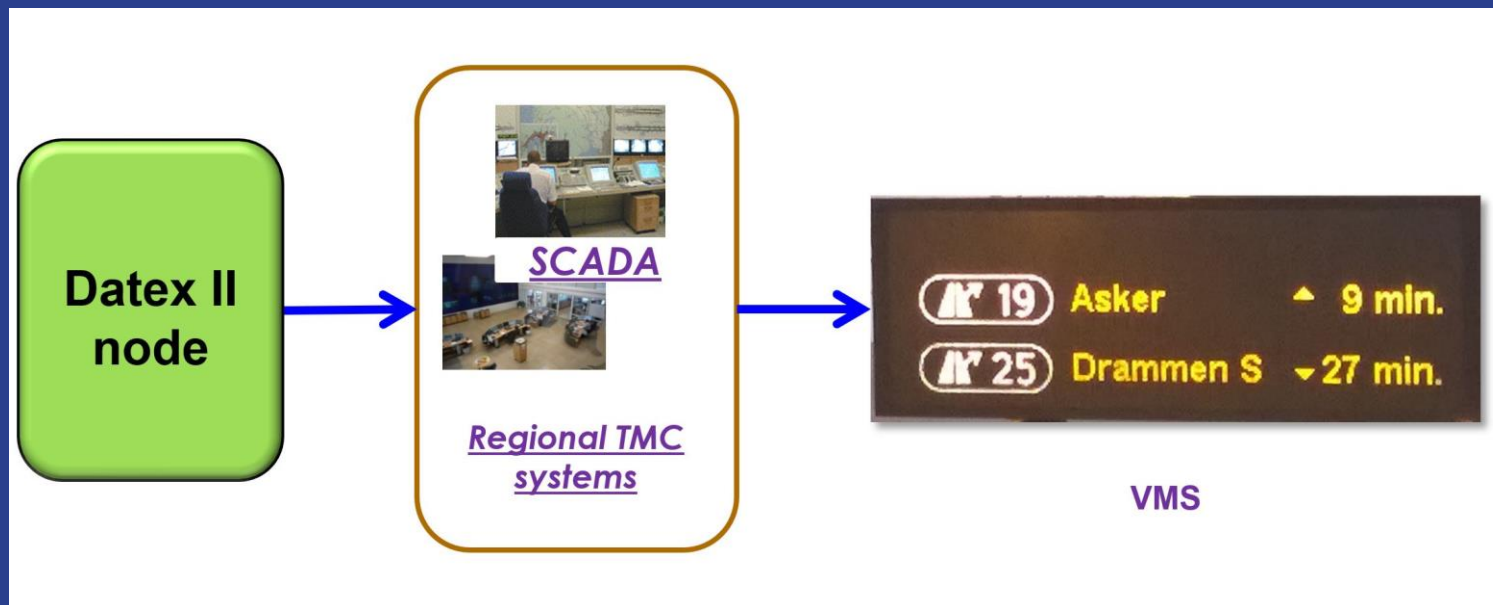

Datex II - system architecture Norway

DATEX II

Integration Datex-node - TMC system (Scada)

- Each TMC operates independently and has their own SCADA-system for traffic management (e.g. tunnels).

DATEX II

Travel times from DATEX II to VMS

2018: Deployed on
33 VMS

DATEX II

Traffic incidents from Datex II to VMS
