

DATEX II Forum

Getting to know DATEX II

– EU EIP cooperation, Recommended Service Profiles –

25th November 2020

EU EIP – European ITS Platform

Who we are

Road authorities and operators from all over Europe cooperating on ITS corridors and EU ITS Platform (EU EIP)

What we do

Harmonise and deploy European core ITS services in TEN-T network

Support implementation of the ITS Directive and subsequent Delegated Regulations

Collaborate on improving corridor performance

Develop & maintain harmonisation tools and processes

Stimulate dialogue with core actors in ITS domain

Plan and prepare for future ITS needs

What we achieve

Reference Handbook for harmonised core ITS service deployment

Cross Corridor Cooperation Results

KPIs of ITS deployment/benefits

ITS Toolkit – Evaluation Library

NAP community building

Innovation Timelines and Deployment Roadmaps

Inform. services quality frameworks

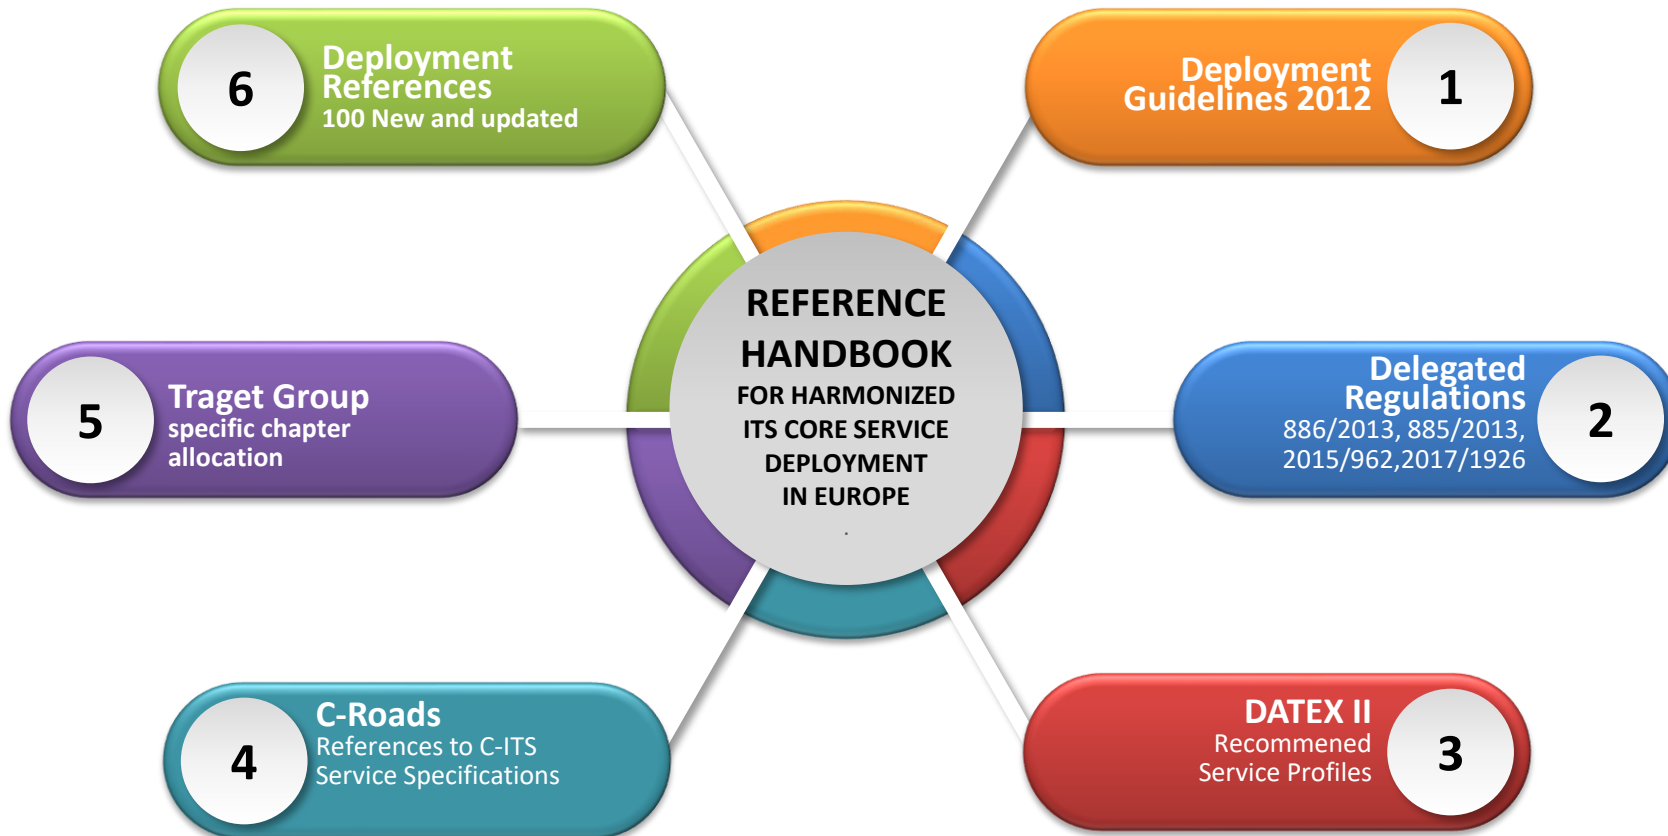

Physical and digital infrastructure attributes for automated driving

How to automate road operators' own ITS

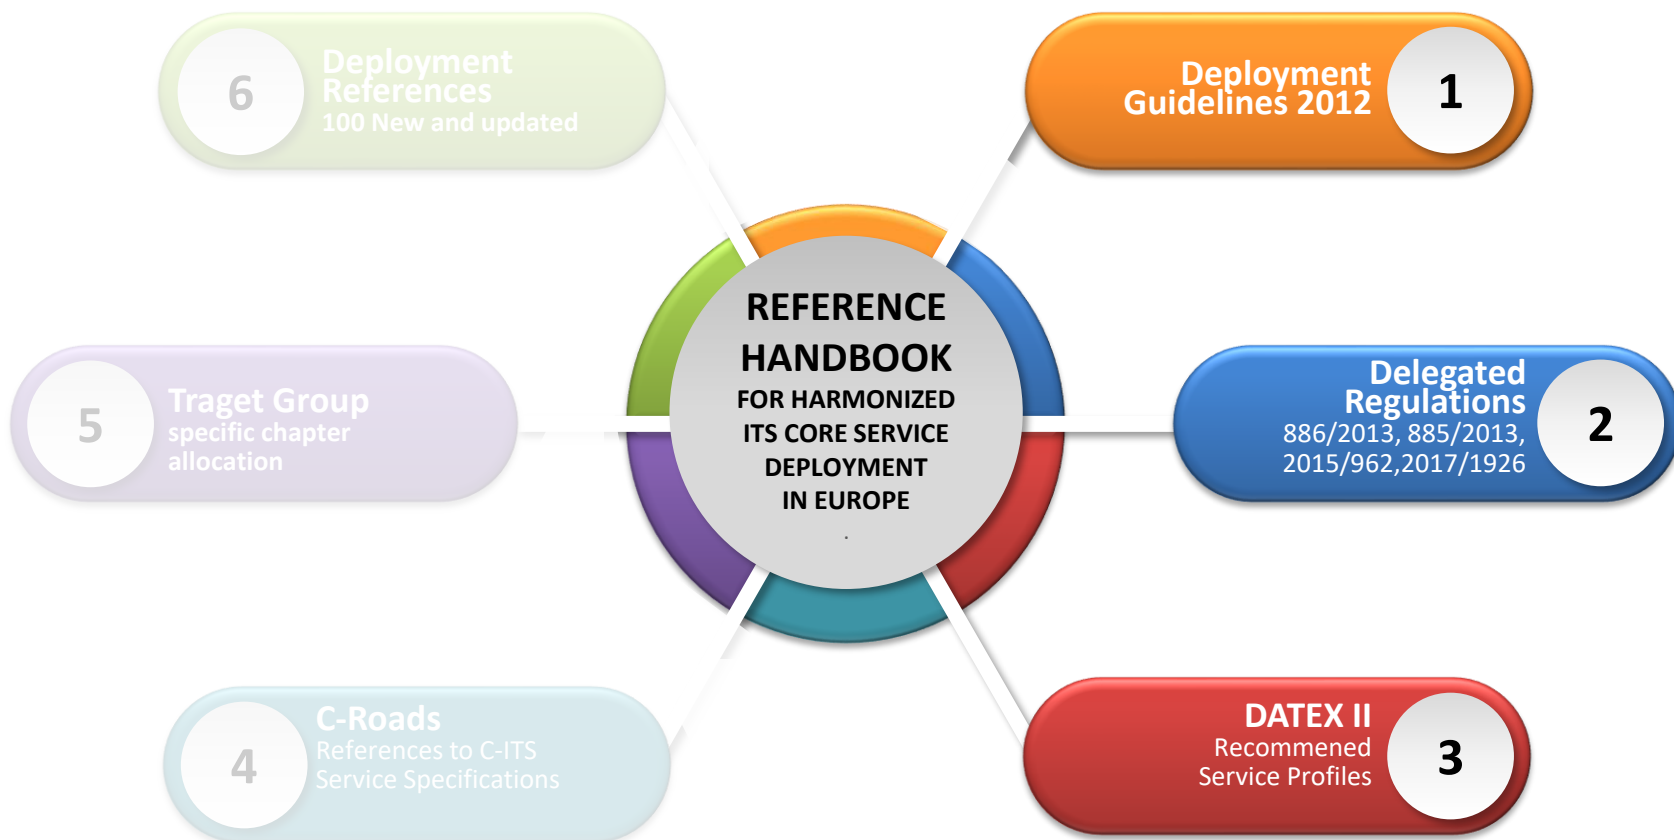

Integrating C-ITS into road operators day-to-day business

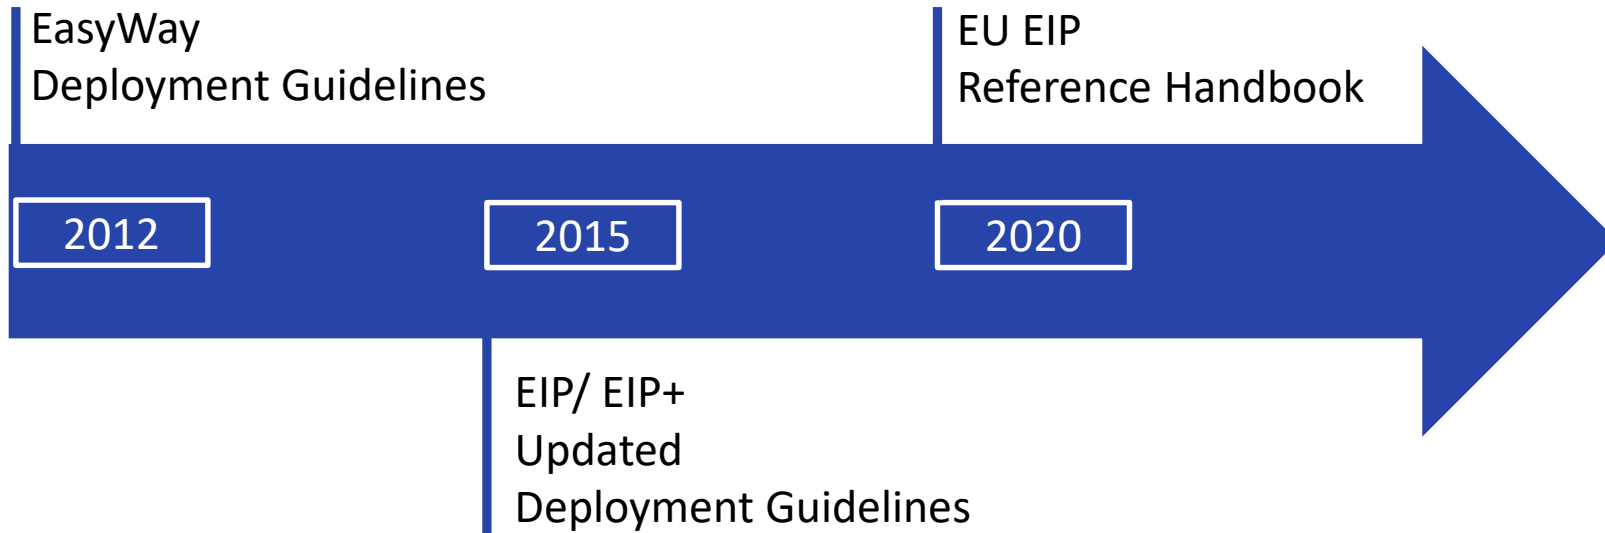

ITS Forum

- What is new?

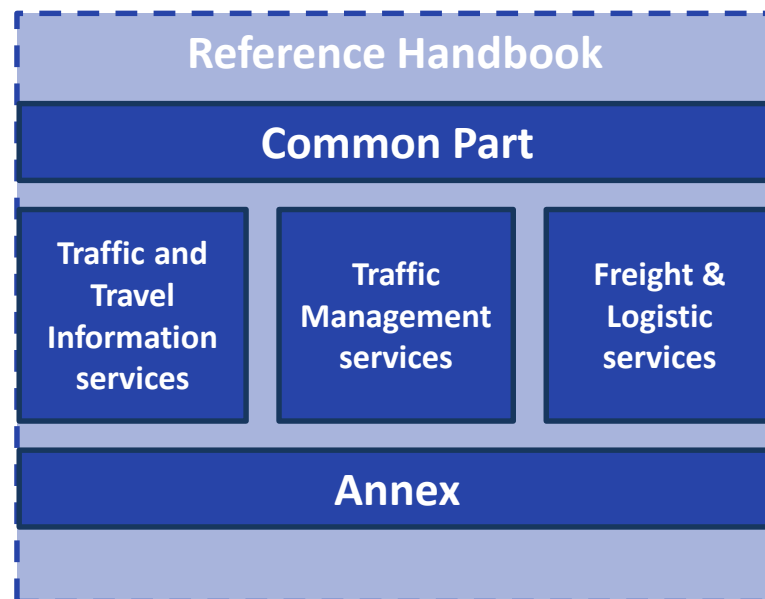

- What is new?

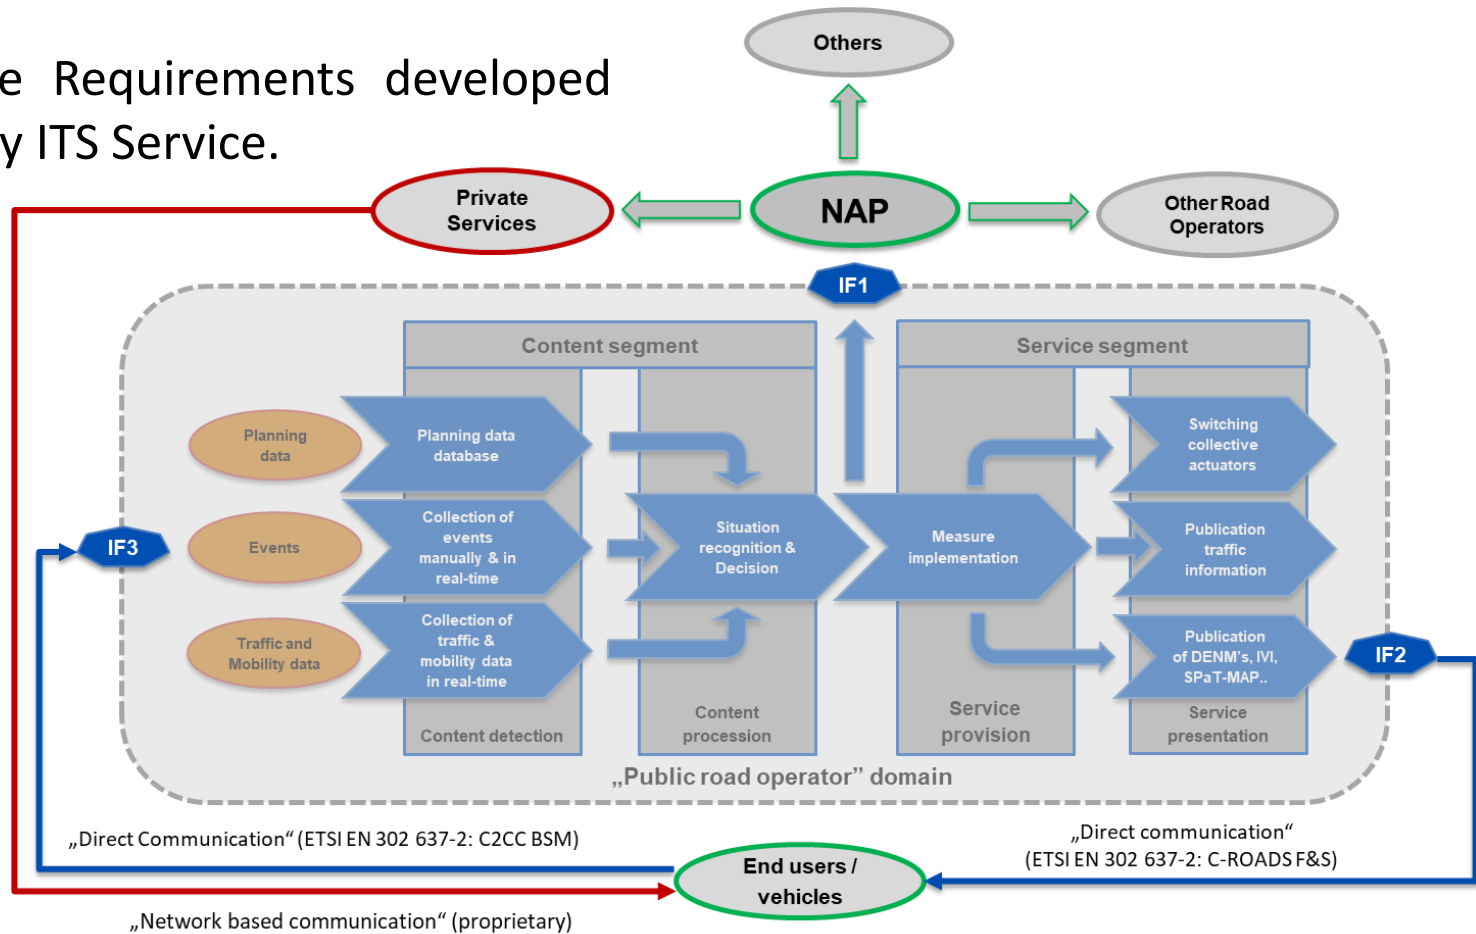

- Initially 19 Deployment Guidelines
- Common Conceptual Setup
- 14 ITS Services

Which data needs to be made accessible in each Member State:

- **(EU) 885/2013:**
the provision of information services for safe and secure parking places for trucks and commercial vehicles and
- **(EU) 886/2013:** the provision, where possible, of road safety-related minimum universal traffic information free of charge to users .
- **(EU) 2015/962:**
the provision of EU-wide real-time traffic information services
- **(EU) 2017/1926:**
the provision of EU-wide multimodal travel information services.

- Interface Requirements developed for every ITS Service.

In cooperation with DATEX II PSA:

- Recommended Service Profiles for every ITS Service developed
- Freely available on the DATEX II Webpage:
<https://webtool.datex2.eu/wizard/#>
- Linkage via Interface Requirement and Information provision standards:

Interface Requirement

IFR1: Variable Speed Limit service **must** provide at interface 1 [...] information on the current speed limit including the following elements [...]:

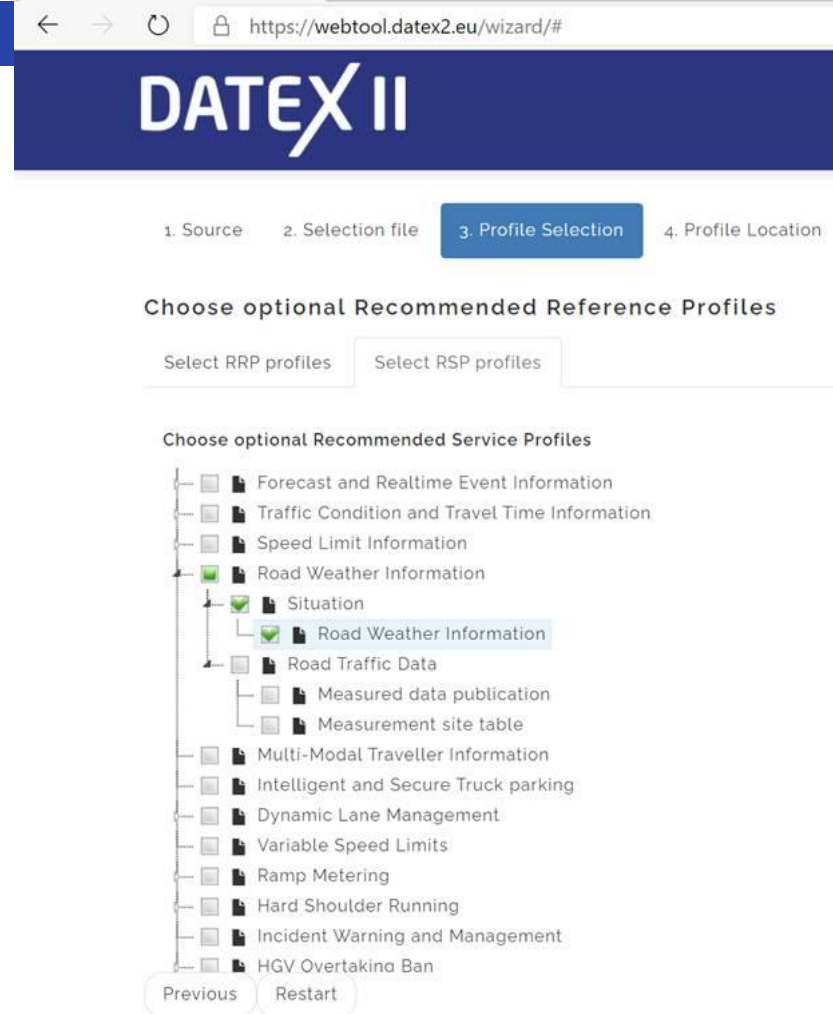

- Sign ID
- Active Speed Limit (display value, shown on the variable sign)
- Location of the Speed Limit sign (coordinate information for mapping)
- Timestamp
- Location reference where speed limit begins (e.g. road address, direction)
- Where necessary, the type of vehicle concerned by the Speed Limit
- Validity (advanced)

Information Provision Standard

IPS1: If a Variable Speed Limit service is implemented at interface 1 (see IFR1), it must be profiled based on CEN/EN 16157-3 using the DATEX II Recommended Service Profile for Variable Speed Limits or any international machine-readable format fully compatible and interoperable with DATEX II.

In cooperation with DATEX II PSA:

- Recommended Service Profiles for every ITS Service developed
- Freely available on the DATEX II Webpage:
<https://webtool.datex2.eu/wizard/#>
- Linkage via Interface Requirement and Information provision standards:

The screenshot shows the DATEX II webtool wizard interface. The browser address bar displays <https://webtool.datex2.eu/wizard/#>. The main header is "DATEX II". Below the header, there are four steps: 1. Source, 2. Selection file, 3. Profile Selection (highlighted), and 4. Profile Location. The main content area is titled "Choose optional Recommended Reference Profiles" and contains two buttons: "Select RRP profiles" and "Select RSP profiles". Below this, there is a section titled "Choose optional Recommended Service Profiles" with a tree view of service profiles. The tree view includes: Forecast and Realtime Event Information, Traffic Condition and Travel Time Information, Speed Limit Information, Road Weather Information (expanded), Situation (expanded), Road Weather Information (expanded), Road Traffic Data (expanded), Measured data publication, Measurement site table, Multi-Modal Traveller Information, Intelligent and Secure Truck parking, Dynamic Lane Management, Variable Speed Limits, Ramp Metering, Hard Shoulder Running, Incident Warning and Management, and HGV Overtaking Ban. At the bottom of the tree view, there are "Previous" and "Restart" buttons.

Summary and next steps

■ Summary:

- Reference Handbook for harmonized ITS Core Service Deployment in Europe
- Delegated Regulations
- DATEX II
- C-ITS
- Target Group
- Deployment References

■ Current status:

- Reference Handbook has been reviewed by the MS
- Comment resolution
- Agreement on final version
- Web based version
- Dissemination
